Alexandria, La., Feb. 21.-On last Sunday the gunmen, detectives and officers of the Santa Fe railroad and the American Lumber Company began a campaign of violence against the Mer ryvilla strikers.

Organizers Cline, Eastman, Baker, Oliver and Denny were kidnapped and deported. Cline was slugged and Oliver was shot in the foot.

The mob has been in possession of Merryville ever since Tuesday. They raided the office of the union and seized all books and papers, carrying them into the offices of the American Lumber Company. They deported acting Secretary Mumford, wrecked the strikers' soup kitchen-the only place where the hungry children could be fed, and drove our women away from it at the point of guns. On Wednesday all remaining union men were

deported under penalty of death if they re-turned. All union signs were torn off from shops and houses. Citizens were searched with out a warrant or due process of law. The mot is running the town in true highbinder fashion.
The chief strike breaker of the Santa Fe is reported to be on the ground and that road is to

Lumber Barons Scared

The Bosses are wondering what the I. W. W. intends to do in the woods this summer. strong taboo has been placed upon I. W. W. litcrature, and especially upon the "Industrial Worker" and the Lumberiack. A known subscriber is often fired. In many camps the bullcook is ordered to search the bunks and the men's clothing for literature while the men are working. Sabotage is what worries them more than anything else.

In many camps the bosses had intended to stockpile and then force a strike in the summer so as to discourage organization, but their plans were knocked in the head by a bad streak of on strike and Chief Long started the first clubweather that stopped all work and took the bing; when the girls were followed along the place of the intended lockout.

Silk Workers Strike In Hazleton, Pa.

The textile workers in the factory of the Duplan Silk Co. of Hazelton, Pa., are out on strike against the intolerable conditions.

For year after year the wages have steadily one down in the face of a rising cost of living. An iniquitous fining system is in vogue, together with a method of discharge without cause against which there is no redress.

The fines imposed upon the workers have peen upon every possible pretext, conditions finally reaching the point where the workers rould stand no more.

Although organizers of the A. r. of L. were n the scene, almost the entire force decided to organize without craft distinction into one in dustrial union of the I. W. W. F. E. Daniels acted as organizer for the I. W. W.

Following are the demands made by the strikers:

"Wages to be raised from 10 to 40 per cent the latter for workers now getting less than \$1.00 per day.

The fining system to be entirely abolished. All summary dismissals to cease at once. No discrimination against any who are active

Better sanitary conditions throughout." Altogether about 1400 workers are out on strike.

As these workers have joined the I. W. W., because of other textile victories of the organization, all locals should see that their confidence is not misplaced. Funds are needed to carry on the strike. Send all remittances to Andrew Beck, strike committee treasurer, 517 E. Dia Ave., Hazelton, Pa.

Bill Haywood Answers Labor Fakirs

Vancouver, B. C., Feb. 22, 1913.

Chas. H. Moyer, President Western Federation of Miners, Denver, Colorado.

Sir: In the official organ of the Western Federation of Miners, issue of February 6th, there appears a statement under the caption "A Near View of Bill Haywood," the same purporting to be from Adolph Germer. It could only have been written with your connivance and approval. You know that what he sets forth as facts regarding collections made by me in behalf of Steve Adams are contemptible and mali-

You have in the office of the Western Federation of Miners my report of all collections made and the expense account incident to the same. You know that it was not I who failed of an accounting and you further know that up to this time, though nearly five years have passed, the W. F. of M. has failed to make an adjustment.

In view of my standing with the working class I am enti-

tled to a hearing and a vindication; it is not for you, the jealous enemy, to condemn me ex-parte.

The Socialist Party and Organized Labor generally are entitled to know the truth in connection with these charges, and to this end I demand that a representative committee be authorized to make a complete investigation and report of my stewardship of the finance of the Western Federation of Miners, this investigation to cover the entire period of my official connection with the W. F. of M.

You are to name two of a committee of five. I will name two, who will be in all ways satisfactory to the Socialist and the Labor movement, the four members thus appointed to select the fifth member of said committee.

This committee to have free access to all documents, paers, books, minutes and files of the organization.

You must agree to this investigation or stand branded of guilt worse than that of which you would convict me.

GENERAL EXECUTIVE BOARD P. Eastman, Jos. J. Ettor, Ewald Koettgen, F. H. Little, J. M. Foss

Entered as second-class matter, May 21, 1910, at the Postoffice at Spokane, Wash., under the Act of March 3, 1879.

"The ascetic makes out of virtue a slavery."—Nietzsche.

If you are good enough to be hired by the boss you are good enough to belong to the I. W. W. It is the payroll against the coupon clippers. Line up with your class.

- "Wot's de matter, Bill ?"
- "Capitalism's busted up me home."
- "Gee! Bill, that's too bad. How did it happen?"
- "Jim Hill hitched an engine to it and hauled it away."

The I. W. W. is absolutely the only organization in the coun try which makes no discrimination against the negro. The only negro we are against is the employing negro and that is because he is an employer and not because his skin is dark.

We fight for more of the good things of life right now. That's economic determinism. We also fight for industrial freedom. That's our historic mission. Unlike other classes the propertiless workers have nothing to fall back upon. We are on the firing line. Too long have we whined like whipped dogs. From this time on we are going to fight. Nothing but freedom can stop us.

JUST SING IT

"Children," said the teacher, impressively, to the assembled starvelings of the Ghetto, "you should never tell a lie. Honesty is the best policy. Truthfulness is essential to success.

The children wondered why the clows of the teacher's coat were frayed if this were the case.

"Yes." continued the teacher, "we should never indicate by word or deed anything that will not bear the light of truth. We will now sing 'My Country, 'Tis of Thee!' "

The children sang, gazing meanwhile at their native land beneath their fingernails.

Moral: Never tell a lie. Just sing it.

THE JAIL

Capitalism is digging its own grave. Every move it makes weakens one of its own supports.

The jail is one of the bulwarks of the wage system. Not the actual jail but the fear of it. Not the fear of torture in the jail nor even of being deprived of liberty for a term. The jail has been a bulwark because there has been attached to an arrest a certain amount of disgrace that brought on social ostracism.

Ignorant capitalism is overplaying its hand. By multiplying arrests and seizing workers upon every conceivable pretext it is rapidly destroying the disgrace that is attached to arrests. Perhaps it is not ignorance, but merely the old cry "After us the deluge.

But consider for a moment what chance capitalism would have to exist if the millions of unemployed were to lose all fear of the jail and, in defiance of a capitalistic created public opin ion were to break the rules of the capitalist skin game?

It may yet come to that for it is evident that the rebellious workers cannot much longer stand the strain of supporting by money contributions the numerous cases of their imprisoned fellows

The various free speech fights are but the forerunner of some such action as mentioned above. And what can capitalism

With a tremendous body of prisoners on their hands the machinery of the law would be elogged; the treasuries would be depleted; the taxes paid by the petty traders would rise and the profits of the greater capitalists be decreased. Were an attempt made to give productive work to the prisoners it would mean that a new army of unemployed would be created from the ranks of those who are now working and who are more or less in a state of contentment. This would furnish new recruits for the jails.

This picture may appear fanciful, but if the wholesale ar rests continue, capitalism, in addition to acquiring some agita tors in its jails, is liable to have agitators thrust upon it.

Also there is a growing suspicion that between the jail bird and the wage slave, the man who is "on the inside lookin' out" has much the best of it.

A FREE PRESS

While it is impossible to unify conflicting economic forces atill there is a point upon which all persons who dare to have a new idea will soon have to agree. Every believer in mental freedom will have to stand together to fight for a free press repressions be direct or through the State

and free expression of opinions. The postoffice department is BERGER'S MUTUAL AID AT SIX PER CENT trying to institute a condition similar to that which is said to exist in Russia.

The higher governmental officials, those who hold positions of trust-and we suspect of Trusts, being incapable of thinking for themselves, desire that a penalty be placed upon those promise between labor and capital is impossi who are not so unfortunately situated. Their recent actions show that the iron heel of despotism is being pressed downward more firmly than ever before.

The cases of Elbert Hubbard and the Idaho editors are demonstrations of the governmental methods of stifling all criticism against social conditions, even when there is no revolutionary purpose behind the expose.

The case of Eugene Debs and still more lately, that of the suppression of Margaret E. Sanger's articles on sex questions in the New York Call, are direct blows at the working class.

When the government sends out bulky volumes telling farmers how to raise healthy pigs and then denies the workers the right to discuss the matter of sex hygiene to the end that healthy babies be reared, it is giving ample proof that prudery never stands in the way of profits.

While we are at variance with the Appeal to Reason conception of Socialism as being a sort of a social umbrella that will automatically be raised to shelter humanity from the storms of adversity merely because a majority of citizens have so written on a ballot, still we must regard the fight against Debs as being to a large extent one that is against the interests of the toilers as a whole.

We cannot believe that the remedy for these abuses is more subscribers to the Philistine, the Call or the Appeal, and if some workable plan can be formulated whereby we can fight together directly against the withdrawal of such freedom of the press as still remains, and for an extension of the right, then the I. W. W. can be counted upon to whole-heartedly aid in the fight.

Whether the National Free Speech League can be the common grounds on which we can meet is problematical. But one thing is certain and that is that all those who dare to have ideas and to express them must combine to the end that all governmental interference be stopped, for the government of the United States, like that of every other country, and that of past ages, is utterly opposed to any attempt at thought expression on the part of its subjects.

SABOTAGE VI.

The press is one of the greatest agencies used by employers to keep the workers in subjection. It is dominated by the industrial matsers. Sometimes the press is owned directly, sometimes controlled through a mortgage or a secured loan. More often the subsidization of the press is accomplished through advertising patronage. But at all times the power of the capitalist press depends upon the servility of the slaves who do all the work of setting up, printing and distributing the lies of the masters. Sabotage is the most effective weapon for the stopping of newspaper attacks upon the workers and their or-

As a whole the reporters are favorable to the workers. They have to follow the policy of the paper to hold their jobs, how ever. They can use sabotage on the masters by their handling of the news. The editors of the various departments will color the matter anyhow, in accordance with the wishes of the advertisers or stockholders of the paper. But when an article is written that is harmful to the working class there are many ways in which it can be saboted.

The linotype operator can misplace a portion of the copy The proof reader can insert or remove the word "not" and thus change a knock to a boost. The make-up man can place another article where it was intended the lie should go or he can even insert a part of another article under the offending heading so that it will apparently read correctly and yet will not contain the harmful material. The stereotyper can damage the face of the offending article so that it will not print. These are but a few of the many methods that might be used. All of these "accidents" are happening every day in publishing plants and it but remains to direct them to a revolutionary end. With more class consciousness along these lines the employers will find it does not pay to lie about the workers.

The militia can be made uscless by the extension of the use of sabotage. One sabotice can make harmless toys of the entire equipment of a company. When a trainload of soldiers are dispatched to a strike scene, where they always act in the interest of the employers, the train can be saboted. In Parma, Italy, for example, the farm laborers struck. Soldiers were ordered to the scene. The engineers refused to pull the train from the depot. Volunteers to man the engines were secured from the ranks of the soldiers. When these scabs entered the cab they found that some vital part of each engine had been misplaced. They were forced to walk to Parma. Bridges unaccountedly disappeared in advance of the line of march. When the weary and disgusted troops arrived at the scene of the agricultural strike they found that the strikers had won and were back at work.

Realizing that the railroads are the arteries of commerce the capitalists of this country have practically purchased the engineers by a high wage and by the establishment of an aris tocracy of labor. But a few rebels are bound to creep into their ranks. Even if every one of them remained a traitor to the workers by being loyal to the employers still they could not escape sabotage. A bar of soap in the boiler would keep the soldiers at home or else force them to march to the strike. If this were not possible there are water tanks where the boiler must be filled and the saboticr can "Let the Gold Dust Twins do the work.'

In case of wars, which every intelligent worker knows are wholesale murders of workers to enrich the master class, there is no weapon so forceful to defeat the employers as sabotage by the rebellious workers in the two warring countries Sabotage will work in this case when resolutions, parliamentary appeals, and even a call for general refusal to serve, are impotent. But, as stated before, sabotage is but one phase of the question. Anti-military and anti-patriotic agitation must also be carried on.

Sabotage is, however, a mighty force as a revolutionary tactic against the repressive forces of capitalism, whether those

The ways of the transcressor may be hard but those of the compromiser seem even hard er. As I. W. W. men we stand for the class

war uncompromisingly, not that we like war out merely because we recognize that com

Victor Berger, ex-Congressman, is one of those who differ radically from us and he is attempting to show us how he can so submerge the class war as to actually persuade the capitalist class of Milwaukee to subsidize, with their advertising patronage, the Daily-Leader of which he is editor.

Here is an extract from Berger's prayer in the Leader to the capitalists beseeching their advertising:

A Talk to Business Men

The Leader has made the claim that Leader advertising pays big. Next week we will tell our readers to mention the Leader to your clerks when they buy. We will assure them of your co-operation and the co-operation of your employees. All through the mercantile and advertising worlds there is a healthy tendency to mutual aid between manufacturers, merchants and publishers.

One of the charges that Berger is fond o making against us is that we are trying to get to the millennium by a short cut, but we must say that we have never painted the millennium as having actually arrived as one could readily infer from this delightful picture of the "mu tual aid and co-operation" existing in Milwau kee right here and now between that valiant Revolutionary, Victor Berger, and the Capital ist Class.

This extraordinary manifesto of the cessa tion of the class war impelled us to scan the advertising pages of the Leader with an unusual interest to see what manner of Capitalis ions had been so easily led into the Socialist Fold. We must say that we did not get much enlightenment from the usual array of department store ads, which do not differ materially from those in the Los Angeles Times.

We have no doubt all these stores are run upon the eight-hour day with full time allowed for luncheon and plenty of seats for tired clerks. No doubt child labor in them is un known, and no doubt none sell goods from sweat shops. We say no doubt, for otherwise we do not see how the Leader could prevent Editor Berger from exposing any such delin quencies and thus destroying the beautiful 'mutual aid" picture, not to mention losing the ad.

However, there is one large and top-of-the column ad in the Leader by a concern which we must admit we never before had heard was noted for its extension of the right hand of fellowship to labor. We refer to the United Cigar Stores Co. If there is one notorious labor-union busting concern in America it is the Tobacco Trust and its chief distributing auxiliary is the United Cigara Stores Co.

We can readily understand with what joy the Tobacco Trust embraces the Milwaukee Leader upon inaugurating this new era of "mutual aid and co-operation" but we confess we don't actly see why Militant Revolutionist Berger seems to enjoy the newly established fraternity with such gusto.

Of course, The Leader is financially hard up and frankly says so. It is looking for "mutual aid and co-operation" and money, especially noney, from any old source. In fact, it is looking so hard that it is driven to make its readers a very misleading offer of so called Six Per Cent Bonds.

We have no objection to the Leader getting all the money it can from its readers upon a straight plan of donation with no hope held out to the subscriber of his ever seeing his mone igain. But when it offers its "Six Per Cent Income Bonds" it is not appealing from the standpoint of a gift to the cause of "mutual aid and co-operation," but it is representing to the subscriber that he is to get a bond well secured as to capital and interest. In fact, the very advertisement in which Berger offers these bonds states that "capital and interest on these bonds is secured."

When we hear of a bond being "secured" w naturally think that means the security is something tangible, say real estate and build ings. A bond conveys the idea of a mortgage on real estate divided into a number of equadifferent lots in order to facilitate disposal among a number of small investors. It also usually represents money that has been paid for something valuable and tangible. But how bout these Berger bonds!

Do they represent any investment to be made? Not at all. They represent not assets, but debts now made and to be made. They are said to be secured but have they security? No! They are merely "secured" by an agre which provides that no interest shall be paid until current expenses are paid and if in any one year there is no profit then there will not be 6 per cent interest on the bonds for that year nor will the deficit be made up by the 6 per cent cumulating and being paid when the company has profits. In fact, the bonds are not bonds at all. The investor in these "Sir Per Cent Mutual Aid Leader Bonds" is merely buying stock in a water logged publishing com pany which is heavily in debt. The holders of the real bonds will have preference over him as to interest, and as they have a mortgage upon the real estate and machinery also, they naturally have preference over him when the company may be wound up and the assets sold out and the realized money distributed.

Berger in his advertisement of these called "Six Per Cent Income Bonds," which are quite unsecured, fails to mention anything about these other unadvertised bonds, held by other more favored investors, which have priority over the advertised bonds since they are secured by a mortgage upon the tangible property of the publishing company. These 6 per cent income bonds are of the true Blue Sky variety, they are not bonds and they have no

We would suggest to Berger that now he has inaugurated an era of "mutual aid and co-oper- civity within the shell of the old.

ation" in Milwaukee between capital and labor that he should sell his "income bonds" to the banks and trust companies who would esteem it a great favor to be allowed to purchase such raluable securities on the ground floor.

We note that the Leader carries an ad from Espenhains, whoever that may be, offering five bonds with every ten cent purchase, which bonds are doubtlessly as well secured as Berger's "Six Per Cents." Here is a pointer for the United Cigar Stores Co.: Why should they not lay in a block of the "Six Per Cent Income Bonds" before they are all snapped up in order that they might offer one with every five sent scab cigar?

What greater example of "mutual aid and o-operation" could be offered than this? The Morgan Tobacco Trust Lion gamboling with the Berger Income Bond Lamb on the green advertising pages of the Milwaukee Leader. It should be a drama fit for the movies. What

HAYWOOD DEFINES SABOTAGE

Sabotage means action.

Sahotage means technical knowledge of how. Sabotage will civilize a policeman. Sabotage will make an injunction look like

the baptismal certificate of a new society.

Sabotage will transform an army of aniformed murderers into peaceful crusaders.

Sabotage will protect human life from the

adulterous poison of capitalism. Sabotage will make work for men and women and play for children.

Sabotage will compel safeguards on dangerous machinery and will prevent terrible mine

Sabotage will exact the truth and stop the lying statements in the subsidized press. Sabotage is a revolutionary weapon with

which every worker is armed. Sabotage will prevent disaster for railroad trains will be run on rails instead of streaks

of rust. Sabotage is the law of the workers. Sabotage will make the capitalist system

profitless. Sabotage, instead of sterilizing men, will sterilize dollars: "Dollars should never breed."

Sabotage is against profit, interest and dividends, and is used to hammer back, pull out, or break off these fangs of Capitalism.

According to reliable reports good job erganizers could do fine work in the following places in Alaska: Juneau, Treadwell, Skagway, Whitehorse, Ru-

PREAMBLE OF THE I. W. W.

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people, and the few, who make up the employing class, have all the good things of life. Between these two classes a struggle must

go on until the workers of the world organize as a class, take possession of the earth and the machinery of production and abolish the wage system. We find that the centering of the manage

ent of industries into fewer a makes the trade unions unable to cone with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry. thereby helping defeat one another in wage wars. Moreover the trade unions aid the employing class to mislead the workers into the belief that the working class has interests in ommon with their employers.

Their conditions can be changed and the in terest of the working class upheld only by an organization formed in such a way that all Ita mbers in any one industry, or in all industries, if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an in jury to all.

instead of the conservative motto, "A fair day's wages for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system,"

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been everthrown. By organizing industrially we are forming the structure of the new e

A WORKIN' STIFF'S PRAYER (By Phineas Eastman.)

Oh Lord, we approach thy throne this day, in the spirit, and through thy meek (?) servant, our Holy (?) Minister, do thank thee for the blessings that thou hast seen fit to take from us and bestow upon our earthly masters.

Oh Lord! may you continue, with the aid of your self-appointed servants, to thus punish us for our blindness and cowardly apathy until, unable to further bear our galling yokes, we arise in our might and crush our tormentors who have cornered the necessities of life and made us their slaves.

Our burdens are heavy, our hands bleeding from ceaseless toil and our hearts weary with the weight of injustice and abuse. Though our wives and children suffer the pangs of hunger, do wear shoddy and eat of food unfit for swine and of that but sparingly.

Oh Lord! we realize that it is our weak minds and strong backs that the masters of the earth have used to enslave us, to their glory and our sbame.

We thank thee for the palaces in which our masters dwell; the automobiles they ride in; their rich homes and bounteous feasts: their purple and fine linen; and, in fine, Oh Lord, since you have seen fit to make of them thy distributors of all the riches of the earth, which, according to one of thy servants. We ask no more than enough to keep our souls and bodies together, lest we, becoming fat and sleek like them, should cease working long hours with our hands and begin to improve our minds-the blackest sin we could commit, for do your preachers not enjoin us to obey our masters?

We are becoming rebellious, though, Oh Lord, and have begun to question the right of a few of thy stewards to cop everything that is conducive to happiness, leaving us everything that in productive of wretchedness; and we are be ginning to take a delight in being disobedient and if you in the wisdom you are credited with, but which we doubt, do not see fit to give orders to said stewards to divide fair with us, we are going to put such a Hell of a crimp in their pocketbooks that they will have to come down from their lofty perches and go to work or

COLFAX CONDITIONS

According to reports the Pacific Gas & Elegtric Co. of Colfax, Cal., is now employing about 3000 men. Wages are \$2.50 and up for nine hours outside and eight hours in tunnels. Rottent tents, 16 by 26, holding 28 bunks, form the shelter. The bunks are kept warm by being occupied by a day shift and a night shift. Grub is rotten and quite scarce at that. Men in signed to get on the lob. Since February 1 coupon meal books must be purchased. The usual assortment of deputy sheriffs, stool pigeons and "be meek" gospel sharks are on the job for the company. The job needs "civilizing."

About 2000 men are working for the Southern Pacific and the Utah Construction Company Wages are said to be \$2.00 for laborers, 10-hour shift, double track work. Next month 1500 more workers will be needed. Let the rebels keep their eye on this job.

The workers need not worry about a raise in they expend so much energy today they must eat enough to reproduce that energy for tomor row, and whether prices be high or low, the workers must have food, clothing and shelter or they will not have the necessary amount of labor power to sell to the boss the following

Every cut in hours lessens the number of unemployed; every raise of wages gets the workers so much more of the product of their toil. An increase of wages does not come from the workers in the form of more profits for what they consume, but from the decreased profits of the bosses. All unnecessary expenditures come from that great heap of surplus valnes, which the workers so kindly turn over to

their employers instead of using themselves. For example: The workers produce a certain amount (10 equals whole product), a small part of which they must use to replace wasted energy (2). INTELLECTUALS AND THE NEW UNIONISM (By Andre Tridon)

From a book by Andre Tridon on The New Unionism to be published in March by B. W Huebsch, New York. Paper, 25c; cloth, \$1.00 Copyright 1913 by B. W. Huebsch.

Leaving aside China where until recently the possession of a literary degree was the only requisite for the obtention of any governmenta position, we must concede that "intellectuals" the world over have assumed in the conduct of the people's affairs an importance in no way commensurate with their competence. Parlia ments are filled with lawyers whose only qualification for representing a constituency is neither a perfect knowledge of the voters' needs nor special training in economics, but mere fluency of speech.

In Europe, especially in the Latin countries many physicians and teachers share with lawyers the profitable privilege of speaking in behalf of the masses. Radical parties have, been as careless as middle class parties in the choice flicted on our bodies here on earth, is about of their representatives, being obscurely aware that a man sent to Parliament by an artificial geographical division could neither foster nor harm much the manifold interests of the people inhabiting the region. In Italy a physician managed to have himself elected to Parliament on the antiparliamentary platform of syndical-

A realization of the sordid and insincere role played by too many intellectuals in labor polities has finally aroused among the workers an Instinctive distrust and scorn of whoever is not a manual worker. This reaction is naturally bound to carry the workers a little too far and to cause them to ostracize unjustly many men sky when you die," but by showing other from the liberal professions who are also wage slaves and as ruthlessly exploited as any mill hand ever was. We would oppose to the French "manualist's" definition of a worker "A man who works with his hands," Liebknecht's defi-

Even in France, the paradisc of "friends of labor," the reaction of the workers against the professional "thinker" is nothing new. When the Paris section of the International was organized in 1865 many intellectuals sent in their adhesion; we may mention among others, Henri Martin, the historian, Gustave Chaudey, who had collaborated with Proudhom, Corbon, former vice president of the 1848 Constituents and Jules Simon. Two years later, in 1867, one of the burning questions which the international had to consider at its Lauzanne congress some camps are said to be driven by foremen lats" should be allowed to play in the movearmed with axehandles. The French delegates, Fribourg and Tolain, offered a motion according to which, while intellectuals were welcome as members of the international, none but manual workers should be allowed to participate in the work of

"It might happen some day," Fribourg said, "that a workers' congress would be made up almost entirely of economists, journalists, lawyers, employers, etc., which would be a ridiculous state of affairs, likely to ruin the International."

"We bear no ill will to any Tolain added: one, but under the present conditions we must consider as our enemies every member of a class which enjoys special privileges on acfor no one's protection."

They do fight, against a other classes which may remain uncultured, can only lead a civilization to its ruin for their workers. A safe rule for the workers to follow thought is never refreshed at the live fount of productive activity." The intellectual feudalism admired by Renan is destructive of every idea of justice, for "it reduces the producer to the rank of a vassal and submits civil society to a foreign rule."

"The democracy of property holders clings with the energy of despair to the doctrine of special aptitudes and does its best to exploit the superstitious respect which the masses have for knowledge. • • It multiplies degrees and tries to make a mandarin out of the most insignificant man of letters; the parasites as a class profess an unbounded admiration for they act as heralds for the high ence priests of science, ask for big pensions for them and hope by such means to conquer the respect of simple, besides deriving therefrom large personal profits. • • Experience shows that great managerial qualities are not exceptional and are frequently found among manual workers. • • In France the intellectuals claim that their place is in Parliament and that in case of victory dictatorial powers should be conferred upon them as their due. It is against this Parliamentary dictatorship of the people that syndicalists protest. . .

"The true calling of the intellectuals seems to be the exploitation of politics; the calling of the politician is very similar to that of the prostitute and does not require any industrial ability. Do not talk to those people of remov-ing the traditional form of the state . Only science and art would first have to undergo a deepgoing trans formation. For the Art of today is according to Sorel's words "a mere residuum bequeathed to us by an aristocratic society." If the artist with his capricious disposition is almost completely the opposite of the worker "it is because the habits of life of the modern artist formed in imitation of the life of a carousing aristocracy are in no way essential and must be blamed upon a tradition which has been fatal to many men of genius."

To Sorel the art of the future appears as 'an adornment of life Which will do

A striving for perfection for "the highest form of production" will manifest itself regardless of any personal, concrete, immediate and adequate return and will insure the progress of the world.

Thus speak the philosophers and theoricians of the New Unionism. It is interesting to note how little their conclusions and forecasts differ from those of practical workers like Pouge and Pataud. These two powerful leaders of the "extremists" in the general confederation of labor gave a good deal of thought to the "intellectual questions" and the following is a resume of their statements on the subject: Many intellectual, Pouget and Pataud think will greet with joy the dawn of the new era. Among them there will be some for whom the great change will mean a distinct loss, social or financial. Even those, however, will welome the new order, for their talent is stifled in a capitalist society. The material profit they derive from it could not compensate them for the disgust with which their bourgeois er vironment fills them.

Men of the very first rank in literature and cience, retainers all of the capitalist system despise it so heartily that its downfull will seem to them like a deliverance. Their contribution to the constructive work of the post revolutionary period will be the reorganization of the educational system and of the liberal professions.

Mere knowledge will not constitute a claim to a larger remuneration. Whoever accumu lates knowledge is indebted for its acquisition to his teachers, to the discoveries made by the preceding generations, in a word, to his environment." Furthermore all classes of men are equally indispensable to one another and a physician is neither more nor less necessary to bakers, masons and sewer diggers than bakers, masons and sewer diggers are to a physician.

CLARENCE DARROW ON CONSPIRACIES "Industrial Conspiracies," by Clarence Darrow, 32 pages, 10 cents, in lots of 50 or more, cents. Otto Newman, Publisher, Box 701, Port

The famous criminal lawyer recently made a lecture tour of the Pacific Coast delivering his simply expressed though deeply thought speeches on several subjects, the principal one being about industrial conspiracies

At Portland a stenographer took down the talk in full and the same is now presented in pamphlet form. While the pamphlet is copyrighted it is doubtful whether the title would hold in view of the fact that Darrow is delivering the same lecture almost word for word in many of the larger cities. Everyone should read the pamphlet, however.

In his humorous and forceful way Darroy points out the impossibility of a legal revolu-He has had wide experience with law and his judgment appears sound in this ma-

He first shows that the constitution wa framed by men who could have had no knowl edge of the development of industry. He compares it to an act such as a youth of 21 years sitting down to write something to guide his actions at the age of 40.

Next he outlines the method by which the Senate is selected, by state legislatures, and the House, by the people, every two years. Thos elected directly do not take their scats until one year after their selection. Then there is a Supreme Court, appointed for life. On top of that there is a president with a veto power. Anything the president vetoes can pass only by a two-thirds vote of both houses. If it ran this gauntlet the Supreme Court would have to pass upon its constitutionality. Anything of benefit to the workers who have a slim chance before this bunch of fossils. And to change the Constitution a law has to pass through Congress and the Senate, gain the signature of the President, and then be submitted to a vote. It passes only when ratified by three-fourths of the states. This is an impossibility. The only constitutional changes made in 125 years wer passed directly following the Civil war and none of the Southern states were permitted to few minutes the damage was committed. vote. It took a war to get them, which as Darfow remarks is "considerable direct action"

As lawyers and naturalized foreigners are the only persons who are legally required to know anything about the government of this benighted country it might be well for some of the star-spangled-stiffs to get a copy of "Industrial Conspiracies" and wise themselves up on the proposition.

GIOVANNITTI SPEAKS IN

PITTABURG, PA Those who heard Arturo Giovannitti's recent peech in Pittsburg are one in saying that the young Italian is the coming orator of the labo novement. He has only just commenced to lec ture in the English tongue.

In his talks is combined that element of human aympathy without which an economic lecture is as dry as dust, with a rare under standing of the subject.

Parts of his talk are as follows: debt I may never hope to repay in this life. For I am here not as a man. I merely come be fore you as a symbol. No-not even that-as but the dumb trophy—a trophy of your victory. And yet as a symbol that at any time when yo unite and rely on your class consciousness and labor, you can win anything you want as you won the lives of Ettor, Caruso and myselfmarke dat Lawrence for sacrifice. Any time you organize and fight together, you can win anything, even the lives of such as I and my comrades. •

"The first great lesson in this brotherhood is not taught by the Ettors and the Haywoods but by the greatest agitator, the most fearful dynamiter and the greatest anarchist in the world the first born child of capitalism-Hunger

'The brotherhood we speak of here today is no longer a vision, a dream of the far distant future; it has left the field of preparation and now is here in reality—in action. The fire was kindled in Lawrence and in spite of the mighty efforts to extinguish it, it glows brighter and brighter, warming the hearts of the worker and threatening to soon become a mighty conflagra tion that will consume all that is sordid, rotten and decaying in modern society, so that a new er and better society will rise from the ruins This great brotherhood has obliterated all craft and trade lines, and soon it will wipe out race, religious and national lines. * •

HAWAIIAN NOTES

While speaking on the streets of Wailuku, Territory Hawaii, Fellow Worker Albert Roe was notified that no Sunday night meeting would be tolerated. Roe replied that if the Salvation Army or any religious organization came out to talk he would also do so.

On Sunday night, February 2, the Salvation ists were out and Roe also took his stand. He was arrested.

In court next morning he demanded to see the ordinance or law that allowed one organization to speak and denied the right to another The judge was forced to admit that no such ordinance existed, and that the police had overstepped their authority. Roe was released and has been holding some fine meetings since then. The same thing had previously happened in Honolulu and the two victories scored by the I. W. W. have given prestige to the One Big

The I. L. A. is fighting against the I. W. W. out as their record is one long list of scabbery they make no headway. As the police were blind to the attempts to break up I. W. W. meetings, a little direct action was resorted to with wonderful effects. No meetings have since been disturbed.

A large Japanese workingman's society in Walluku, having its own paper called the Lib erty News, is seriously considering the proposi tion of joining the I. W. W. in a body farm laborers are especially taken with the principles, form and tactics of the I. W. W.

New native organizers are being broken in to the work and the I. W. W. is making fine A glance at conditions will show headway. that conditions are ripe for revolt.

According to newspaper reports the prisoners on the chaingang on the public roads at Hilo are being worked without any clothing whatso ever. The wages of laborers are as low as t is possible to make them, ranging from 50 cents to \$1.25 per day. The monthly wage is about \$18 to \$20. The treatment is that of slaves The plantation owners do not regard the work ers as human beings but as mere beasts of bur-

'We went on strike yesterday, February 17 for better board and got the same right away. There was only one scab and he drove the cook to town. The boss, happening to be an Old Stew, went into the kitchen and produced a good meal, but not enough of it. asked the men if it suited them. One fellow worker, acting as spokesman, said "No, you belly burglar." "Well," said the boss, "what do belly burgiar." "We want roast beef, roast pork, chicken, porterhouse steak, pork chops, ham and eggs in the morning." "Oh," said boss, "you want too much." Just then one fel--three. and every man in camp sang "You'll get pie in the sky when you die." HOW FOOLISH SOME STIFFS AREI

Eureka, Cal., Feb. 6 .-- Laborers yesterday ucceeded in playing havoc with the under ground cable of the Pacific Telephone and Tele graph company which runs along the east side of E street, between Second and Third streets by cutting every wire with a saw. The labor ers were cutting a ditch across and after pene trating the pavement and two feet of dirt, encountered the boxed cable. Apparently without a thought, a saw was obtained and in a

HE WILL READ IT

A negro Christian Socialist was aweening the streets of El Centro, Cal., a few days ago when another negro came along with a loaf of bread under his arm.

"Wall. Brother, how are you getting along?"

inquired the Christian Socialist.

"Poor, very poor," answered the other.
"Well, keep on trusting in the Lord and you will come out all right," exhorted the Christian Socialist.

"Yea," answered the other, "two millions o us are starving to death trusting in the Lord. At this stage in the dialogue an I. W. W. handed the negro with the loaf of bread a "Worker" saying: "Read that." The negro looked at the heading for a second, then look ing up retorted: "You bet your life I'll read

He started off across a vacant lot reading a he went. When he was about half way across he turned his head and shouted in tones that showed a new-found hone:

"You bet your life I'll read it."

A CRITICISM (By John Troy.)

If the organization had but one National peri odical in the field in the English language, in steed of three there would be no need of mak ing calls for aid. We could have an eight page paper at all times. By concentrating our el forts we could have the greatest labor paper in

One great drawback at present is that the same articles often appear in both papers, and and put an end to these lawless actions of skid as a result the workers give steady support to none of them

Concentration is better than segregation. Let us have one powerful fighting paper for the 1. W. W.

Ed. Note-Can't agree with this. We need more, not less papers. The total support to ail papers is still far short of what each paper should receive. The principal reason for lack of greater support appears to be the tendency to view the papers as a means of bringing in nickels to carry on other propaganda rather than a means of propaganda in them

Strange Actions in the Southern Lumber Comps

(Continued from page one.)

and steel. There was weeping, wailing and gnashing of teeth among the godly crew and its patriotic passengers. Walking in a cold downpour of rain then became the order of the evening. The next day there were many faces nissing from the scab dinner table, and we, the strikers, knelt in prayer and devotedly thanked our mother Nature's unruly children, whilst the bosses' pocketbook cried aloud in anguish.

Sad (?) news reached us from the silent woods yesterday, which moved many a storn rebel to tears. Listen! and then join us with your weens: A big skidder, whilst being towed slowly out to its scene of labor, decided to take a cold nlunge and rid itself of some of the scabs which encumbered its decks, and arriving at a trestle spanning a deep, and swollen creek, she dipped gracefully and keeled over, carrying all encumbrances with her to the bottom of the water. More lamentations! more wails from poor pocketbook! more desertions from the ranks of the Scissorbill who go to make up eleven tenths of the holy scabs.

We strikers are at a loss (?) to account for all these immoral, not to say unladylike, actions on the part of the bosses' sacred property. How sad it is, when even inanimate machines. strike on their generous (?) employers? It's a damn shame! What are our (?) officers do Why do they not assert their authority ders, pine trees and locomotives? I have something which deals with physical pain, dire agony, raw beefsteaks, black eyes and a sleepless night to relate. This is serious; now don't laugh! Be gentlemanly.

Our union doctor, Fellow Worker Stalsby. after thoroughly fumigating himself, laid violent hands on the sacred body of the American Lumber Co.'s local judge and mayor, the Hon (?) Judge Mason, last evening, and gave his honor one of the soundest thrashings that august person ever had, for fining a union man \$5.00 for "calling down" and striking a scab named Franks for insulting his (union man's) wife. The doctor is in the jug and his honor in bed nursing his scabby bruised body at this writing.

Four hundred rebels, men and women, meet every train at depot, sing rebel songs, and buttonhole incoming strangers and put them next. There are now about 200 scale -inside of bull pen and out in woods. The mills were shut down the 10th and 11th. Excuse was too hard a rain. As they never did close down on account of rain when union meu run the works, we know it was scarcity of logs and men that stopped business. Bosses' private car in last p. m., leaving this a. m. Have not heard what mission means, but as the Santa Fe's time is up according to rumor, and we have them on their knees, ready for the solar plexus, no doubt a compromise is going proposed by the bullies on the job.

Their bluff last week in arresting colored workers for meeting with whites in our hall. did not work for the next day, the colored side of hall was jammed and when we filed out, no gunmen were even in sight. These fine womes fellow workers are still picketing the gates and one very pretty and bright little fellow worker girl, Goldie Estes (no kin to Brute Gunman Estes) induced six young white scabs to desert. This is only an instance—there are others. Three cheers for woman, lovely woman. by us, you rebels of every clime. We have got 'em going. Shake your chains and be free.

P. S.-Woe is me! bring on the beefsteak the arnica and open up the sluice gates of your eyes and let the tears flow. Listen! The biggest bully of all the gun toters, Fred Hamilton. sneeringly remarked to Fellow Worker Rud l'almer, that there was no fight in union men. and Bud promptly proceeded to make his face look like a chopping block. Hamilton pulled his gun on Palmer, but Sheriff Gus Martin-who must "have seen the light" lately-stepped in and drew his gun on Hamilton and remarked that this must be a fair fight. Hamilton is a Santa Fe scab gunman. Deputy Sheriff Kinny Reid, the most cowardly bully and most overbearing of the gunmen, interefered and struck l'aimer when off his muard.

renow Workers Emerson and Baker, who were nearby, were arrested by this dirty bully, Two Gun Kinney Reid, and locked up along with Fellow Worker Palmer. F. W. Baker, who is from Minneapolis, told Reid and his gunmen that if they would lay aside their weapons he would whip hell out of every one of them.

Bully Ham.iton is 6 feet 2 and weighs about 250; F. W. Palmer is about 5 feet 10 and weighs 170 pounds.

This makes three scabs laid up for repairs and four of our fellow workers in the jug. Funds badly needed. Answer the call.
