Six Gangster Crowd Gives 'Buy American' Plan Full Support

Coffins, Crutches, Prostitutes, Gambling, and other 'Frisks' made Clothing are all Included in Panacea for Depression.

BOULDER CITY, Nev.—This Domain of Six Gangsters is supporting the "Buy American Campaign" one hundred per cent. Three new American made coffins were sold February 7th for the latest victims of Gangsterism at Boulder City. American made crutches, spigots etc. were distributed to the several injured, the same day.

Also three new plots in an American cemetery all covered with cool American made bodies who ever heard of an imported grave marker for a dead worker? "Buy American!" screams Hearst's Sheets and thousands of billboards, (All probably printed on imported paper pulp.) And buy American the slaves of Boulder Dam do. No low wage or forced labor products for them! The shelves of the Gangster Stores are loaded with Big Yank work shirts and all kinds of other American prison made clothing and shoes.

Buy American! all along the highway between Boulder City and Las Vegas those Grand Old American Bootleg Joints sell that Purely American Rotgut.

Buy American! Down on the Line in Lay Vegas, where the homelessless Construction Sliffs go to patronize the women of the oldest profession. They can do nothing else, because the Nevada Prostitution Law, in all its majesty, decrees that only American citizens may play that profession. It is even rumored that Baldy Crowe advised the Six Gangster Directors to establish such a house so that Gangster Scrip could be accepted at face value by the unfortunate women. Of course the company would take the usual exorbitant rent fees in such places.

"Buy American!" say signs in the gambling joints. To prove their sincerity underneath each Buy American sign is another which says "We take Scrip". Scrip is discounted 50 per cent. and that is buying American since the very life of that part of the American Working Class is tied to scrip as wages is credited into that 20 per cent discount.

The Six Gangsters themselves started buying American more than 18 months ago, they bought the Boulder City Post of the American Legion. (They still own it.)

"Buy American!" say the robbers. "Get a red I. W. W. card and make America worth buying" say the Union Men of Boulder Dam.

Canadian Courts do The Expected Thing; Conviction Upheld

Sioux Lookout I. W. W. Members Are Railroaded. Sentences from One to Six Months. Glaring Example of One-Sided Capitalist Justice.

PORT ARTHUR, Ont.—The railroadings of the boys sentenced in the Sioux Lookout cases was upheld by Judge W. A. Dowler at Kefauka, Ontario in trying the appeal.

As an aftermath of relief camp trouble in Sioux Lookout on Dec. 9th the following sentences were meted out: George McAdam, H. Snider, B. Taylor, T. Spenk, and J. Furlong, J. Furlong and J. Malauko, all six months a piece, G. Kent, three months and G. Furlong, one month. Furlong has already served his sentence and is out. Kent was offered remittance of sentence if he goes to work in a road camp.

The trouble first started as a result of the rotten conditions imposed upon those men who were incarcerated in a relief camp at Sioux Lookout. As a means of securing some measure of relief from unbearable sanitary conditions and food, the men held meetings and decided upon certain courses of action. Many concessions were secured.

Then came the demand that the men go to work on the highway or in logging camps at \$10.00 per month. Meetings were held and the men voted to demand 30 cents per hour before they would go to work. This was the scale last winter. Demands were refused and the men ordered to disperse. A demonstration held earlier over tobacco ration demands was held as an excuse to "let" the ringleaders, and George McAdam, Ben Taylor and Harry Snider, all of whom were members of the I. W. W. were arrested. One man, Spenk, was missed and the police returned to get him. The men tried to prevent his arrest, with a resulting melee. Finally the police resorted to firearms, firing through the roof, and Spenk gave himself up. The others were arrested immediately afterward.

The following Tuesday the men were tried and sentenced without benefit of defense counsel or witnesses. Attorney for defense men seen almost impossible to secure. Finally a young man by the name of MacCusack undertook to appeal the case. But in the final analysis, it would have been to everyone's advantage if no defense lawyer had been hired at all, for all the good it did. One of those workers who were on the spot wrote as follows: "The defense lawyer was weak in many respects. He let the Crown get by with murder. It was a clean cut frame-up to bleed the working class of their money and at the same time keep our comrades and fellow workers in penal servitude. The bourgeois mouth-piece told me that the defense witnesses would be doing well to disperse." This was after the conviction of McAdam, Spenk, Snider and Taylor had been upheld, but before the appeals of the others had been considered.

In the words of the same correspondent: "The old justice tried to put most of the blame on McAdam and also implicated Taylor as a ringleader. He rebuked the boys for not kissing the Bible. He regarded the demonstration as a sily thing fit for a comic opera. If he could only see himself in the act of dealing out capitalist justice. Yes, it sure looks silly to those parasites when a worker goes after his rights. It burns me up to badly to hear those boys make one-sided justice stand that I can't find words to express my feelings."

Meanwhile, let us build up a strong Industrial Organization to force, by the use of economic action, the doors of prisons wide, open to release all class war victims.—Harvia.

MICHIGAN'S "BANK HOLIDAY"

In Michigan banks declared a moratorium on money for eight days to save the banks. Workers, all over the country, should declare a moratorium on profits (and strike) to save the human race.

Unemployment Hits All Time High in The British Isles

LONDON.—Unemployment is now at its highest peak for all time, the government's latest figures showing 2,903,065 persons receiving jobless benefits, an increase of 174,778 over the number on the rolls in December.

These figures do not present the true extent of unemployment, however. Through various schemes originated by the Tory-controlled government hundreds of thousands of jobs have been stricken from the benefit list, although they have not returned to work and there is little prospect of them getting jobs in the near future.

Ulster's Railroads Tied up by Strike

LONDON.—Railroad service in northern Ireland is completely tied up by a strike against wage cuts. Advice from Belfast says that the roads which made a feeble attempt to continue operating with "volunteer" workers have given up the effort.

Two of these "volunteers" were killed in a wreck on their first run and four passengers were seriously injured.

The whole matter has been thrown back into direct negotiations between the carriers and employees.

C. & O. R. R. Profits Go Hand in Hand with Workers Wage-cuts

CHICAGO, Ill.—Reports show that the C. & O. Railroad made more last year than in 1931. It is small wonder that the rail barons want the rail wage cut continued and further slashes made. That is the source of the surplus. Profits for December were eight millions of dollars, an increase of a half million. The Santa Fe, Illinois Central and the Pennsylvania also report increased earnings. This can only be accounted for by the wage cuts as the car loadings are far less than the year before.

Grace Lines Try to Run American Ships With Chinese Crews

NEW YORK CITY.—About 20 Chinese coolies were imported in New York on the GRACE LINER—SANTA THERESA—to take jobs on AMERICAN boats.

The twenty men are to be employed on Grace Line steamers; their wages will be SEVEN dollars a month, and of course the company will save from food-stuff.

According to one of the Grace Line officials these men "can do the regular seamen's work on a daily diet of rice."

If this disorganization of the Marine Workers continues, before long we'll find out that we will either be permanently displaced by such imported cheap labor or our standards of living will be brought down to what is represented by the \$7 per month.

New High in "Snipe Shooting"

ERIE, Pennsylvania.—The busiest business in Erie outside of the I. W. W. One Big Union newspaper is the snipe shooting (steep tobacco) business. But Mother Nature came along with zero weather and a snow storm and put it in the red (haywire) with the rest of its brother businesses.

ALL CHICAGO MEMBERS NOTICE!

A special meeting of the General Membership of the I. W. W. is called for Sunday afternoon, 2:30 p. m., February 19th, at 1618 W. Madison St. It is necessary for you to attend this meeting if you are interested in the welfare of the I. W. W. Keep this late open and make it your business to be there. Things of vital interest will be discussed.

The regular monthly meeting for all members will be held at 7:30 p. m., Friday, February 24th, at the hall at 1618 W. Madison St. Methods and Tactics of Organizing will be the topic for this meeting. An old time member will lead the discussion. Be sure to attend if you can.

By the Committee.

PICKET LINES BRAVE SUB-ZERO WEATHER AND STRIKE-BREAKING TACTICS OF ENRAGED AUTO BARONS

Briggs Body Strikers Stage Huge Motor Procession. Real Spirit of Solidarity Demonstrated. Scabs and Bosses are Discouraged.

(Special to Industrial Worker)

DETROIT, Mich., Feb. 13.—Strikers from Briggs rallied forces today to carry on their struggle for higher wages and better working conditions through the fourth week to victory. Sub-zero weather and strike-breaking tactics of the employers have not broken the spirit of the strikers. All eyes are on Detroit—and them. They have come to realize the importance of the direct action they have started in the automobile industry to workers in industries throughout the country. They are determined to win.

Solidarity Permeation

2000 strikers congregated at the Briggs Mack Plant Monday morning in answer to the call sent out by their Strike Committee. A motorcycle of 700 "passenger" cars loaded with strikers was organized here. Headed by George Cornell, one of the strike leaders, the procession passed through the city to the Briggs Highland Park Plant in the north suburb. The purpose of the parade was to make an appeal for solidarity from the men who have returned to work at the Highland Park Plant and to let the public in general know that the Briggs Strikers were still going strong, intimations from the "Joy-boys of Journalism" notwithstanding.

"Labor solidarity is the key of invincible power—Organize—Be a real man—Don't scab."

"We need American—with what?"

"We need your moral support—Don't scab."

"All for one, one for all—Organize." The above were some of the signs which caught the eyes of onlookers in the motorcycle made its way along its 13 mile route through the heart of the city.

The parade was able to pass through Highland Park due to a permit which John W. Anderson, of the Strikers' Committee, secured from members of the Highland Park Council after Chief E. L. French, of the Highland Park Police, had refused the permit. With honking horns the strikers paraded past the Highland Park slave house just before noon.

Special appeal calling on the disgruntled men on the inside of the Highland Park plant to "walk-out and join the parade" were issued by the strike committee. 400 Highland Park employees are still out on their strike. Waterbury and Melham employees. Those men who have returned to work are by no means out of the picture. Special deputies and police are still stationed at the Highland Park Plant. The scabs in uniform are doing their best to break up the Strike by telling men at the gates to "go to work or go to jail."

Flying Squads

Due to the severe cold weather the strikers at the Mack Plant abandoned foot picketing on a large scale last week and adopted the "flying squad" method of picketing with automobiles. A flying squad is composed of five men of five men in an automobile. These "pickets on wheels" have been cruising around the strike zones night and day. At quitting time flying squads have been following street cars and demonstrating to scabs that it is not healthy to help Mr. Briggs build his bodies at this particular time. Home calls have also been made on scabs and many have been persuaded to stick with the strikers. 27 scabs left Mack Plant last week and joined the picket line. This method of picketing on wheels has proven very successful. The flying squad acts quickly and silently—but effectively.

Picket lines at Briggs Plants have not been abandoned entirely. In spite of zero weather, they have been patrolling the streets cars and determined men and women have kept up the "march that never ends" at the factory gates. At the head of the line stands Robert "Slim" Barrows. His national policies caused his removal twice, but his services have proved indispensable, as he knows by name every man and woman in the line. Slim says: "When I was a soldier I was all for

violence, but violence is out of place here. This strike is going to be kept as peaceful as possible. That's why the strike committee has ordered all the blind pigs in the neighborhood closed, and that's why we kick any one out of the line who has the trace of liquor on his breath."

So far the strikers themselves have committed only minor acts of violence, mostly in their encounters with scabs. Some strike breakers before leaving the plant have been arming themselves with home-made blackjacks and hammers. Six were arrested last week after members of the picket line revealed to the police that they were carrying sections of rubber hose loaded with metal. Twelve strikers were also arrested the same day. Seven men were arrested before the parade started by police who claimed that they were interfering with men going to work. Of the 51 arrested earlier in the strike, all but 4 have been released.

Cop Shoots Scab

The first shooting of the strike occurred last Wednesday when Patrolman O'Neal shot Samuel Reed, a scab, in the back. According to Copper Koonz, Reed was laying about with a motorist's contract for a job. Reed was shot in a street car when strikers began snatching special badges issued to the scabs. Koonz said he fired once to stop the man, then shot him when he refused to surrender.

Rank and File Reorganize

After ousting Phil Raymond, one-time Communist candidate for mayor of Detroit, from their councils at a mass meeting Tuesday, February 7, the strikers united under the following rank and file leadership: Earl Bailey, chairman of the strike committee; Nick Muchen, secretary; Henning Johnson, chairman of the strikers' relief committee; and George Cornell.

R. M. Pilkington, commissioner of conciliation of the United States Department of Labor, is trying to induce the Briggs automobilers to confer with these rank and file leaders. President Walter Briggs and his despotic associates have now no longer any grounds upon which to hedge from meeting with the strikers' relief committee, and George Cornell, "right of free contract between employer and employee" as opposed to collective bargaining.

Clarence Darrow to Help

Clarence Darrow cordially received a committee representing the Briggs strikers in his home, Sunday, in Chicago. The committee, Bailly, Johnson, Muchen, Darrow and Palazola, placed their side of the story before him and asked Darrow to advise them in their negotiations.

The famous attorney found the plea of the committee plausible and said he "would be glad to help them". He advised them to place their complaints before state and federal bodies with demands for an investigation.

Why Jobs are Scarce

Lots of times, judging from what you read in the papers, you would think that unemployment on a large scale was unknown before the crash of 1929. This might lead you to believe that as soon as the depression is over there will be no more workers without jobs. But look at the facts! During the most "prosperous" years before the crash there were plenty of unemployed. Prior to 1910 the standing army of jobless numbered about one million. By 1929 it had increased to about three and one half million. Since that time it has increased continually until it is now admitted that over worker out of every three in the country is out of a job. The way things are going it won't be long until only one out of two will be employed. Over twelve million men is a huge number of men to be thrown out on the street without any means of making a living.

And what do they offer you in place of a job? First of all charity from relief stations and soup lines. This they are glad to do because they are afraid of what twelve or fourteen million desperate men could do to the country if they were liberated. Next, they offer you a job in a factory. But the factory is not a place of opportunity. It is a place of slavery. The factory owner is not a capitalist. He is a slave master. He is a man who has taken the life of the worker and has made him a slave. He is a man who has taken the life of the worker and has made him a slave. He is a man who has taken the life of the worker and has made him a slave.

Each and every one of these fake remedies are the result of the efforts of the United States to evade financial and moral responsibility for the continuation of an outrageous social system, based upon the exploitation of labor, of which the emperors are the beneficiaries. A glance at the following figures will show you that the man who has profited from the terrible conditions of the last few years...

Dividends vs. Wages

Each and every one of these fake remedies are the result of the efforts of the United States to evade financial and moral responsibility for the continuation of an outrageous social system, based upon the exploitation of labor, of which the emperors are the beneficiaries. A glance at the following figures will show you that the man who has profited from the terrible conditions of the last few years...

1928... Dividends, \$282,000,000; Interest paid on personal property, \$339,000,000; Wages, \$32,000,000,000; Dividends plus interest, \$3,011,000,000.

1928... Dividends, \$50,000,000; Interest, \$11,000,000; Wages, \$2,500,000,000; Dividends plus interest, \$1,508,000,000.

1928... Dividends, \$1,013,000,000; Interest, \$1,008,000,000; Wages, \$1,300,000,000; Dividends plus interest, \$2,021,000,000.

1928... Dividends, \$1,013,000,000; Interest, \$1,008,000,000; Wages, \$1,300,000,000; Dividends plus interest, \$2,021,000,000.

1928... Dividends, \$1,013,000,000; Interest, \$1,008,000,000; Wages, \$1,300,000,000; Dividends plus interest, \$2,021,000,000.

An electric steam shovel picks up eighteen cubic yards every time its jaws bite into the ground, while a man with wheel and shovel would take four or five days to do the same work.

Magnetic cranes, belt conveyors, electric hoists and other forms of modern power equipment are capable of handling tons in less time than a man can handle pounds.

One man with a tractor-drawn can sow an acre of ground in fifteen minutes, while it takes four and a quarter hours to seed the same area by hand.

A modern automatic baking machine can turn out as many loaves of bread in an hour as one hundred bakers using the old style french oven.

Only a couple of years ago 500 cigarettes a minute was high speed for a tobacco factory machine. Today they are capable of turning out as many as 2600 a minute.

One plan can turn out 10,000 auto chassis frames a day with only 208 men at work.

Comparisons of this sort are endless. Every worker can read similar statements which have taken place in his own industry.

Realizing the appalling extent to which machinery is depriving willing and capable workers of their jobs we are confronted with the very important question as to what is to be done about it. As long as our fate as workmen is bound up with the accelerating automatic process of big power machinery it is vitally necessary to understand our class position in relation to the machinery of today and the machinery of tomorrow.

As far as we are concerned, as workmen, there can be but one solution. As things stand now we do not have to be reminded of what has happened as a result of private ownership. We have been locked out of the industries by the millions. Only the employing class and their determination to make price in the use of the means of production of goods, is to blame for what is happening.

The world is no longer governed by scarcity but by abundance. We are living in the midst of plenty. The triumph of the machine over man-power has degraded most of us to beggary. And scientists now predict that in a few years the number of jobless will be doubled. It is a possibility that eventually the machine will possess the power to take the place of man altogether. The employers will then have solved the problem of cheap labor power to their satisfaction. But who will they sell their goods to?

DECREASE OF MAN POWER IN AUTO INDUSTRY

The automobile industry was considered the harbinger of the new industrial era of untold prosperity. The fall of the automobile was a disaster. A few short years since that the saturation point in automobile consumption is a long way off if it ever comes. On that basis "prosperity" of the automobile industry was to last indefinitely.

In the year 1904 it required about 1920 man hours to build a motor car; by 1919 this figure dropped to 303 man hours or less than one-fourth of the 1904 labor effort. However, in the year 1929 it took just ninety-two men hours to produce an average automobile.

In other words, within a period of only twenty-five years automotive technology decreased the human labor power required in the process of car building by eighty-three percent. This figure will show a further elimination of human labor in the period to come, as the saturation point is being reached, and competition will force further mechanization of human labor.

In 1918 and 1919 the average selling price of a Ford car was about \$360, and the cost of production about \$90. Today the much improved cars of that class sell for around \$400, and the cost of production about \$100. This is an actual reduction cost of a little above 100 percent. It was stated in the year 1918 that the main ambition of Henry Ford was to produce a car which would sell in the neighborhood of \$100. This could only be accomplished by an almost total elimination of human labor, which stage the industry is rapidly approaching.

Manless Machines and Workless Man.

Where Workers Pass Law

Wherever the organized workers gain partial control over the shop in which they work, we have the growth of industrial democracy. If the workers have been employed eight hours a day and they force their employer to grant them the eight-hour day, they are passing an important law of the shop. That law springs from the power of the workers to govern the shop.

Tips to the Workers

CHARLES SCHWEIN

The Brain Clerk papers advocate as a cure for our economic ills such meaningless platitudes as "Buy American" and "Buy American."

Workers, you will NOT ORGANIZE AMERICA! Join the Industrial Workers of the World!

In a depression like this, the working class requires a union. The matter of whether they survive or perish depends on it.

And, without such a union, they will find themselves in the position of helpless individuals dumped into the angry sea of unemployment and world crisis.

So why not start now and line up in the One Big Union of the I. W. W.?

What are unemployed workers but "Fugitives from Starvation"?

The I. W. W. is either 100 per cent industrial in form, structure and tenets or it is not the I. W. W. Why stop half way and argue with the politicians?

The bosses, without consulting us, looked about 14,000,000 of us out of industry. Why not, without consulting them, or any political fakery, give the boss class the air via the General Lock Out.

Employed and unemployed workers, by getting together and refusing to scab on one another can leave the Parasites of Industry out on a limb.

But they can't do it by taking advice from the politicians and trying to beat the other fellow at his own game.

The solidarity of labor is as good for us as it is bad for the bosses. Let's give 'em more of it.

After all is there anything that will be the place of solidarity?

Brisbane, the official heifer-dust drinker of the Kept Class says: "There are millions of men out of work and no one has any adequate plan to see the situation."

Shine on you Arthur! When you take your coat to coat trim in the vanished 'bullman cars could better drop off in Chicago and get a copy of a pamphlet called this GENERAL STRIKE, published by the I. W. W.

This remarkable little booklet will show you everybody can be put to work including Arthur Brisbane and his butter-necked 'Friends of the employing class.

One way every worker can retain his self-respect and remain in good standing with his conscience is to keep a Red Card in his pocket—and keep it paid up.

It's not let anybody kid you into believing that there is any better way than the One Big Union way.

Paupers Replace Starving Farmers Kicked off Land

NEW YORK.—Of all the asinine ideas ever in the back of the infantile brains of the bosses' tools, the back to the land movement is the berries. The cry of the democratic leaders is to get the unemployed out of the cities and back to the farms.

It is a trade in the back of the heads of the charity fakery a lot of work and reduce the tax on the wealthy to pay a dole, and the latter is the core of the whole situation. It is obvious to the intelligent that farming is not a trade to be picked up in a few weeks. It is a skilled profession and the professionals are going broke by the thousands.

Just Another That Good Wages Help to Bring Good Times

CHICAGO, Ill.—Declaring that one of the principal causes of the depression was the "belief of our business men and financiers that wages come out of profits," a worn-out theory that intelligent men have discarded, Edward A. Flene, Boston merchant, in a recent address said that labor unions serve in no way responsible for our industrial collapse.

Flene's program of shorter hours and higher wages had been accepted in time the depression could have been largely avoided, Mr. Flene declared.

POLITICIANS LINE UP SOLID AGAINST INDUSTRIAL IDEAS

SPOKANE, Washington.—The three Spokane daily capitalist papers are trying to paint Technocracy with disrepute. They are taking rays at the technocrats in union and the SLP, Communists, Socialists and the rest of the reformers are joining in on the charge.

Technocracy raising its head above the mists and gloom of the present decayed system drew an exact boundary line between industrial socialism and the rest of the capitalist class. The technocrats have proved that the I. W. W. is on a plain of its own, entirely devoid of competitors. On Feb. 10th a short time will tell.

Steel Trust Matching Huge Reserve Profits Against Slaves' Hunger

NEW YORK.—Since 1929 the United States Steel Corporation has reduced its dividends twice and also cut wages 200,000 workers. Now the steel trust is getting ready to pay out \$25 million in dividends. It is a shame that the steel industry is operating at 14 per cent capacity. During the year 1929 the steel industry paid out about \$18 million in preferred dividends and checked off 25 millions to depreciation of plants. This all came out of the huge reserves. These latter are so large that the company can pay out \$25 million in preferred dividends for a long time to come long longer can the unemployed steel slaves hold out against starvation?

Georgia Chain Gang Probe Being Pressed

NEW YORK.—Charges of inhuman cruelty on Georgia chain gangs, repudiating unsworn since November 17, have again been put to the Georgia Board of Prison Commissioners by Arthur Garfield Hays Sulzberger, general counsel for the American Civil Liberties Union. The charges, prepared on behalf of 11 prominent Americans who signed the official statement, were based on documentary evidence gathered by John L. Sparks for his novel, Georgia Nigger.

COLBERTS MURDERER FREE

BENTON, Ill.—The murderer of Jas. Colbert has gone free. On Jan. 21st James Sutton was again shooting up the death secretary of labor 303 J. M. W. of A. at-Orient, Colbert, a militant miner was called from his home last August and shot without any opportunity to defend himself.

National Free Tom Mooney Congress to be Held in April

Appeal is Issued to All Union and Workingclass Organizations. Will Meet in Chicago, Conference Now Forming.

SAN FRANCISCO, Calif.—A national "Free Tom Mooney Congress," based on a call issued by Tom Mooney to "every A. P. of L. union, to the railroad brotherhoods and all other labor unions; to all working class organizations; to all liberal organizations sympathetic to the work..." will be held in Chicago April 20 to May 2, 1933, under the auspices of the Tom Mooney Mothers' Defense Committee.

Preparatory organization steps for the national congress will be taken by local conferences to be held in every large industrial center of the United States. The San Francisco Conference will take place at Equality Hall on Feb. 12-14, which delegates from labor, liberal and left organizations have been invited. A similar conference has been called for New York City on March 12.

Following is the text of Tom Mooney's call for the Congress, issued by the Tom Mooney Mothers' Defense Committee:

"I hereby issue this call for a FREE TOM MOONEY CONGRESS, to be held in Chicago, April 20 to May 2, 1933. I appeal to every A. P. of L. union, to the railroad brotherhoods and all other labor unions; to all working class organizations; to all liberal organizations sympathetic to the work..."

Capitalism is Teaching the Workers that Capital and Labor are Brothers and that they cannot live without each other...

Capitalism is teaching the workers that capital and labor are brothers and that they cannot live without each other. It is teaching them that the rich must always be rich and the poor must always be poor. Because God wants it that way; in other words they tell the workers that things are what they are because they are as they are and nothing can be done about it. The press, the church, the radio, the movies and other agencies of capitalism are discharging into the workers concrete ideas that they are brothers and that they like hell and die to go to hell, because God wants things that way, and nothing can be done about it.

Good luck to you, boys! And take this tip from O'Connell—stop begging for "bunions" and other cheap handouts and line up with your fellow workers in ONE BIG UNION and TAKE what you fight for.

"A word fit for heroes is fit for me. I am damned if I let the Capitalist World be 'Up and at 'em,' as Wellington cried at Waterloo.—Covant.

Cloumakers Win Three More Strikes

PHILADELPHIA, Pa.—As a result of a noisy dispute in the three contracting shops of Baffel, Land and Swatches, who are the contractors for the Bellanca C-2, a strike was declared in all three shops.

General Organizer Jacob Hoffman, and Samuel Axian, head of the Baffel and Swatches Union, issued a statement that the settlement of the shop on strike will have to be affected by an increase in price per garment and maintenance of all union conditions in all Bellanca contracting shops.

The workers of the shops on strike as well as all other active union members carried an energetic picket work and displayed an excellent spirit of solidarity which has resulted in a settlement for the union in three days.

SAN FRANCISCO NOTICE

Carl Keller has been elected secretary of the San Francisco branch. He will address all mail intended for the branch to him: 723 Harrison St.

Cool Miners, Blind to Class Interests, Are Sorry Lot

HELPER, Utah.—The six hour day as advocated by the AFL has been put into effect by the Blue Bell Coal Company at Consolida, Utah. The six hour day of this kind, however, is only one more job placed upon the unorganized miner of Carbon County. The company men are the only ones affected by the shorter day and it still takes them 7 1/2 hours to make the shift. The only real difference noticed by them is that at the end of the month they will pay check arrives, \$4.20 per shift, the miserable piddly amount for 7 1/2 hours of manual labor underground.

The coal miners in this hot are overjoyed because they fear they have not been affected by the shorter day. They will be wily and proud that we can still drill holes at night and fix the track after the 6 o men have gone out.

The coal operators here are just as satisfied as they are in other parts of the country or perhaps have they learned a lesson from L. Lewis and the U.M.W.A. They divide the miners is the best way to defeat them, by reducing the income of the figger; part by part there is less chance of their uniting.

Some one once said, "United we stand divided we fall." Seems never to have been heard by the slaves in this district. Some day they will learn that the slogan of the I.W.W. is true. Namely, "United we stand, divided we fall." When his burning revolutionary statement is understood by them, they will organize it. 200 Miles in Lake Owen Workers, I. U. No. 2 of the I.W.W. SOME FAMOUS RADICALS OF HISTORY

BY CHARLES M. RIPLEY, E. E.

A brief survey of Pioneer thinking—How it has always been applied—How it has revolutionized Modern Life—How some famous conservatives have recognized the value of Education.

When Thomas A. Edison was trying to make an incandescent lamp, a "highbrow conservative" scientist said: "This poor fellow Edison is wasting his time. A simple syllogism of logic, applied to the fundamental laws of physics, would show that Edison is trying to do something that is impossible."

Here is the logic" (2): First law: There can be no light without a continuous electrical current. No combination can take place in a vacuum. Inevitable conclusion: Therefore no light can ever be made in a vacuum.

But Edison was blazing a new trail, 50 years ago. He recognized in such alleged "fundamental laws," and he succeeded because he defied precedent and because he was different to the resulting criticism and ridicule.

And Steinitz, the electrical wizard of Schenectady, was also a radical—in mathematics, in sociology, in politics, and in electrical engineering. He too blazed a new trail when he formulated the mathematical laws on alternating current electricity by means of which electricity can be transmitted 300 miles. One of his radical statements was his definition of a "high-brow."

"A high-brow," he said, "is any person who is educated beyond his intelligence."

Whenever we turn, we find precedents, laws and methods are different from, and in many cases, exactly opposite to the old, accepted, traditional methods.

People used to think the world flat. Now we know it is round.

People once thought the sun moved around the earth. Now we know that the sun moves around the sun. Yet when Galileo said so, he was put in jail.

Railroad men who used to revolve in the axle. Now they are fixed on their axle. All rubber tires are to be solid. Now most of them are hollow.

People used to think the eye of the needle was at one end and the point at the other end; and we could not have a sewing machine until some radical put the eye and the point both at the same end.

But don't think these improvements—these radical changes—have been carried out without opposition. Columbus and Galileo were ridiculed and attacked because of their views on astronomy.

According to the Boston Independent, the first telegraph wires were cut at the first railroad tracks torn up, and the first sewing machines smashed, and the first automobile had coal (anthracite) in Philadelphia, was cut out of the state of Pennsylvania as an imposture.

Mr. Seth Woodbury, sixty years ago equipped his buggy with rubber tires—before his time. The Common Council of Lynn, Mass., forbade Mr. Woodbury to use rubber tires. The city fathers claimed the tires were so silent that pedestrians could not hear the vehicle in time to escape being run over. So Mr. Woodbury put iron tires on the outside of his rubber tires.

"Bomber thinkers are called dreamers and 'Empire Builders.' Those Pioneer thinkers who also get are often distrusted, despised and ostracized.

"I remember that many old fashioned people not long ago resented the use of anesthetics to make people unconscious in surgery. The objection they raised against it was that it was a Catholic discovery."

(To be Continued.)

IF YOU WANT, FIGHT FOR IT!

E. O. PELASSY

Capitalism is teaching the workers that capital and labor are brothers and that they cannot live without each other. It is teaching them that the rich must always be rich and the poor must always be poor. Because God wants it that way; in other words they tell the workers that things are what they are because they are as they are and nothing can be done about it.

The press, the church, the radio, the movies and other agencies of capitalism are discharging into the workers concrete ideas that they are brothers and that they like hell and die to go to hell, because God wants things that way, and nothing can be done about it.

Speaking of life, liberty and pursuit of happiness, find that there is no such thing in our family, because it follows that—no work, no money, no money, no eats, no eats, starvation, and after starvation comes death.

The politicians and the political economists tell the workers that they have their freedom to choose their own conditions if they want by marching to Washington, D. C. to city hall, to write to their representative and demand what they want, or to vote for this, that or the other party and everything will be O. K. So the workers wait until the election season, and then they go to the polls and vote for the political candidates who promise a chicken in every pot, an automobile in every garage or a full dinner pail. They go to bed at night and dream of all those things, but when the election day comes they wake up and find out that their beautiful

A 20th century philosopher said: "A man one year ahead of his time is 'Progressive' and respected. A man 5 years ahead of his time is a 'radical,' and 'dangerous.' A man 20 years ahead of his time is a 'nut,' and 'shunned.'"

Some one said that the pressure of "public opinion" is like the pressure of the atmosphere. You can see a leaded pipe under the same 14.7 pounds per square inch. But what makes public opinion? Disraeli wrote that "Man is malleable; we repeat without thought the opinions of some third person who has adopted them without effort and is PEAR."

Edison and Ford are NOT mummies. And they are not afraid of ridicule and criticism. Like Montaigne, the only thing they are afraid of is failure.

Before Columbus discovered America, he endured snubs and discouragement, ridicule and mutiny. But he succeeded because he was different.

1. He got started,—and 2. He kept going.

"All men of action know that he who never starts until he sees clearly every move in the game, is lost. As he will say, Fulton built the Clermont and was first to steam from New York to Albany. He was carried by the old time mariners, jeered at by the 'Men on the Street'—even his friends joined in the ridicule.

Langley was the Steinitz in the science of air-dynamics; just as the Wright Brothers were the Edisons in the art of building an airplane. When Langley showed his plans for a machine which would fly without the help of a balloon, they laughed him to scorn. Now 399 airplanes out of 1000 have been built.

In 1822 a group of men in England, called the Well-Made Cloak shop had been settled. The settlement was made through the Jobbers of the cloak company, Miller and Robbins.

The Organizer Jacob Halderin directed the meeting which decided to call a general strike of the cloak industry to better the conditions in the shops. Power was given to the Executive Board to begin immediately preparations for the stoppage.

The workers of the Well-Made Cloak Company return to work under union conditions.

Nothing could prove the inadequacy of the railroad workers so-called "union" than the strike in 1922. How long will it take the American "Rail" to have its only protection in One Big Union as advocated by the I. W. W.?

Without Street Cries, Coal Miners' Reward

HELPER, Utah.—Six cents per ton for machine coal is the price paid at one of the U. P. mines in Scotland. This mine is leased by Bernie Newren. He is already four months behind with his payroll. It is doubtful if he will ever catch up. Spring is nearing and the slack season will be on. The diggers are beginning to wonder if their winter's labor has not been paid.

The diggers of Newren's is tough, but the other U. P. mine in Scotland has it beat. This mine is run on a script basis entirely. The Natural Development Association of Salt Lake City is handling this outfit. The miners are paid off in script. The script is good only to exchange to a few farmers in the valley. About all the farmers have to trade is a few vegetables. Meat is put out in small quantities twice a week. This script layout also has a shoe factory and a weaving shop in Salt Lake City, but so far very little shoes or clothes have come this way.

It is also sold for cash by the script grafter. One can well imagine where the cash goes.

Conditions in the Carbon County mines are fast reaching the west Virginia level. The miners here get busy they will surpass even the coalie standard.

The master class have never been known to give anything. If we expect to improve, we will, we will have to organize and fight. Might is right. Get busy.—A.M.

Railroads Report Big Profits But Rail Still Get Ax

NEW YORK.—Class 1 railroads of the United States earned \$22,866,588 in income in December, 1932; an increase of 19 per cent over the net earnings of the same month in 1931. This is the first time since 1929 that the net income in any month has passed that of the same month in the previous year. The figures are given by the Bureau of Railway Economics.

Net Profit of 19 Per Cent Over Same Month in 1932 Means Meet Tough Luck for Workers

Net operating income of Class 1 roads for the full year was \$384,324,950, as against \$387,945,488 for the full year of 1931. This is a decline of 37.9 per cent.

In railroad circles, however, the full year comparison is not considered as important as the comparison by months. January, 1932, opened with a scant one-third of the income of the same month of the previous year. February, March and April fell behind the 1931 standard less markedly. May and June were distinctly worse; and in July, the net income of 1932 was barely more than one-fifth what it was in July, 1931.

Upturn Continues

Then the upturn began, and has continued, though irregularly, ever since. The contrary is true. On November 15, 1932, the railroad payroll cost \$15,032 fewer workers than on the same date a year before. The decline is continuing. On October 15 and November 15, 1932, 20,010 railroad workers were "laid off."

Nothing could prove the inadequacy of the railroad workers so-called "union" than the strike in 1922. How long will it take the American "Rail" to have its only protection in One Big Union as advocated by the I. W. W.?

The Weekly Record of Cracks in the System

Work Peoples College

Monday, the 13th, the Senate Finance Committee began its investigation to find the cause of the crisis, summoning 55 of the leading habits to testify behind closed doors. Those summoned are the hands of a shrewd hands this country has been for a long time. Al Smith has announced that his advice will be to "put the constitution on the shelf." Roosevelt gets big headlines for his "new" economic program, a plan described by him as "bankable," on the score that it is the largest public works campaign yet conceived; it will put a little over 1 per cent of the unemployed to work. Just a little more the needed reformation of the district will make it a much better country for the workers to take over.

The search for bankable plans in Germany has led to Fascism. Hitler went to the prestige of his promises and has the pledge of constitutionalism. He has now stated his policy: "No unreasonable experiments of an economic or social order... preservation of the existing order... matters more urgent than upending agitatory promises." He has banned all Communist, Socialist and Anti-Fascist meetings; he has gagged the entire opposition to work. Just a little more the needed reformation of the district will make it a much better country for the workers to take over.

According to reports of the Briggs Strikers Relief Committee, families of the men still out on strike are beginning to suffer from lack of food. A total of 400 families are being cared for through a monthly food supply set up by the strikers under the Mack plant. Supplies are centralized at this station from all over town. A recent report issued by the committee showed the following quantities of foodstuffs were issued since the strike began: 7850 pounds of bread, 25 bushels of potatoes, 750 pounds of beans, 600 heads of cabbage, 40 bushels of turnips, 40 bushels of onions, 28,000 lbs. of fresh vegetables, 50 gallons of sauerkraut, 500 pounds of sugar, 450 pounds of coffee, 25 gross of cakes and cookies, 7200 pounds of meat and 2280 quarts of milk.

Store-keepers of the community have continued to remain friendly to the strikers' cause. The Detroit Chamber of Commerce has donated quantities of food. Those around the plant attempted to secure the injunction restraining the mounted police from riding up and down the sidewalk.

Headline in the New York Times: "Moros Fear Independence for Philippines as Christian Tribes Far Outnumber Them." At the times at last joined the A. A. A. and decided to let the cut out of what has about the missionaries?

DEMOCRACY AND DOLLARS In twelve states, Alabama, Arkansas, Florida, Maine, Massachusetts, Mississippi, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, and Virginia, citizens voted and they met certain party qualifications.

Detroit Auto Strike

(Continued from First Page)

"I never knew of any employer to pay more than he had, likewise any worker who did not want all that he could get, and then think it was enough. Their interests are diametrically opposed, and the employer has the advantage," said Mr. Darrow.

The members of the delegation reported on the successful conference with Mr. Darrow at a mass meeting of the strikers Monday after the parade. "His offer of aid marks a turning point in the strike, and will turn out well," says Strike Committee Chairman Bailey.

Headlines of local newspapers lately have been trying to stir up a scare of the "Red Menace" to the good people of Detroit. Mastering-ling Chester M. Culver, General Manager of the Employees' Association of Detroit, has supplemented the "journalist's" scarecrow with the aid from the Association in which he attempts to convince citizens that "the welfare of the community is at stake".

WHILE WORKERS STARVE

THE PARASITE CLASS IS "SITTING PRETTY"

CHICAGO, Ill.—It sounds like a truism to repeat that capitalism, through its control of prime moving machinery and monopoly of natural resources, is the purpose of fattening a parasite class at the expense of the earth and the good of mankind.

Dividends and interest are still pretty much outside Old Man Depression's territory, official figures reveal, and when apologists talk about "capital taking it on the chin" they are all wet.

For 1929 the total was \$6,028,000,000. And 1928 was supposed to be the best year of prosperity. BUT— For 1929 the total was \$7,500,000,000 and for the next two years it ran over eight billion each year.

Through the New York Times we learn that although 1932 was a "depression year", the twelve largest banks in the city of Pittsburgh which, while among the leading cities in the nation, is far removed from the head of the parade, paid dividends averaging more than 22 per cent on their capital stock.

At the Special Meeting of the members of the Chicago Industrial Workers' Committee will be elected to tabulate the following Referendum ballots:

Nominations must be in General Headquarters on or before March 12, 1933. The ballot will be issued immediately after the date.—Harbert Kuehlius, Chairman G. O. C. I. U. 330.

OFFICIAL NOTICE

All delegates should notify immediately the Clearing House of the amount of supplies they have on hand in order that clearance may be issued them from the General Office and their supplies be transferred to their 1933 credentials.

I. W. W. PREAMBLE

The working class and the employing class have nothing in common. There can be no peace so long as longer and want are found among millions of working people and the few who make up the employing class have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members be united in industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

Talks on Interesting Subjects at Frisco Open Forum

SAN FRANCISCO, Cal.—At an Open Forum held recently at the I. W. W. hall in San Francisco at 729 Harrison Street, talks were given by the following speakers: Class Tactics and Quack Remedies.

Fellow Worker Holmes expounded the aims, principles and final goal of the I. W. W. and very ably pointed out the fallacy of the "wage system" and the need for new receiving to much space and attention in the public press.

In conclusion the speaker clearly demonstrated that the only remedy for the working class was Industrial Organization. I. W. W. Direct action such as picketing of shops and industries by employed and unemployed, that the Union is not a creation of the Law. That the strike is not sanctioned by Law. The strike is a necessary means of forcing the chaotic state of production. That we, as workers, must develop an iron endurance, unity and persistence of purpose, and as long as there is power to organize, there is a steady supply of work for the wage slaves of the world.—1935-50.

If they do not, the strong strike sentiment may precipitate another strike.

Though Briggs officials claim that an adequate supply of bodies is flowing to the front, the fact is that only a few very few workers have been called back to the fold by the Despot of Dearborn. Chrysler Corporation is also locking out its employees. They, too, are assured that there is a steady supply of work for the wage slaves of the world.—L. B.
